- The compound “Gluamin Cu” plays a significant role in enhancing plant growth under salinity stress conditions, as highlighted in the attached study. It contributes to stress resistance by improving cellular metabolic processes and increasing the activity of antioxidant enzymes. This reduces the damage caused by salinity stress and boosts agricultural productivity.
- Publishing such research in reputable scientific journals is an effective way to elevate the compound's profile and marketability. It disseminates scientific knowledge about the compound and builds trust in its efficacy through documented research, thereby supporting its commercialization, particularly in the field of sustainable agriculture.

The Chamber of Commerce of Murcia at Embassy of Spain Visit

First Field Day for Our New Cucumber Varieties at Al-Salam International Trial Station

13 Jan 2024

- As part of the strategic vision to strengthen its presence in the seed market, Al-Salam International Company for Development & Agricultural Investment organized a highly successful Field Day on January 13, 2025. The event aimed to showcase the company's most promising cucumber varieties currently under evaluation.
- The Field Day witnessed an impressive turnout, including a wide range of stakeholders such as agricultural consultants, traders, nursery owners, engineers, and vegetable farmers. Their active participation reflected a growing interest in the latest advancements in the seed sector of Al-Salam International.

- During the event, attendees had the opportunity to evaluate the performance of several cucumber varieties in real-time field conditions at our trial station. Based on their feedback and observations, three standout varieties—MELiSSA, 7106, and TURBO—were highlighted for their superior fruit quality, high productivity, and notable resistance to powdery mildew.
- These varieties demonstrated exceptional potential for both commercial cultivation and addressing market demands.

- Moreover, the spiny cucumber variety TATYANA garnered significant attention for its unique characteristics, making it a top choice for pickling purposes. Its robust performance, attractive appearance, and ability to meet industry standards were particularly praised by experts and farmers alike.

- The event not only provided a platform for showcasing the company's advancements in the seed sector but also fostered valuable discussions and collaborations between industry professionals. Al-Salam International reaffirms its commitment to delivering high-quality seed varieties that meet the evolving needs of the agricultural sector, contributing to the sustainable development of vegetable farming in Egypt.

Expanding Our Family

Jan 2025

At the beginning of 2025, Al-Salam International family proudly announces the addition of Eng. Hesham Tantawy to our team as Business Development Manager, reaffirming our unwavering commitment to attracting exceptional talents and advancing our journey toward innovation and excellence. with extensive experience and a strategic vision, Eng.
